

CONTENTS

FOREWORD	7
THEORETICAL FOUNDAMENTS.....	9
1. The theory of heat treatment.....	11
1.1. Introduction. The cycles of the heat treatment.....	11
1.2. Heat transfer	13
1.3. The aim of the heat treatment.....	14
1.4. Heating	15
1.5. Soaking.....	15
1.6. Cooling.....	16
2. The taxonomy of heat treatment.....	17
3. The Fe-C diagram.....	19
4. Heat treatment of iron based alloys	20
4.1. Through section heat treatments	20
4.2. Surface hardening.....	30
4.3. Thermo-chemical treatment.....	40
4.4. Heat treatment of cast iron.....	48
5. Heat treatment of aluminum and its alloys.....	52
5.1. Recrystallizing of cold drawn aluminum and its alloys.....	53
5.2. N-segregation process	53
6. Heat treatment of copper and its alloys	56
6.1. Heat treatment of pure copper	56
6.2. Heat treatment of monophasic copper alloys.....	56
6.3. Heat treatment of multiphasic copper alloys	57
7. Heat treatment equipment.....	59
7.1. Batch-ovens	59
7.2. Continuous ovens.....	64
7.3. Atmosphere in heat treatment ovens.....	65
7.4. Temperature measurement.....	66
7.5. Oven masonry	67

HEAT TREATMENT EXPERIMENTS	69
I. The mechanism of austenitization.....	71
II. Experimental estimation of austenite grain growth.....	78
III. Numerical and experimental investigation of hardenability (the Jominy test).	91
IV. The isothermal transformation of austenite.....	102
V. Recrystallizing of cold drawn aluminum.....	108
VI. Continuous cooling of hypo eutectoid steel	120
VII. Annealing of hardened steels	127
ANNEX: The names of the presented procedures in Hungarian, Romanian, English and German	138
BIBLIOGRAPHY	143
